TAKE IN THAT I HAD A FULL NOTEBOOK”**

PROFESSOR ROGER KIRBY, LONDON

**“WOULD RECOMMEND A TFK EVENT TO
MY COLLEAGUES...IT WAS EXCELLENT”**

DR JON REES, BRISTOL

WELCOME

This is a two day didactic course covering the hallmark aspects of Orthognathic surgery, often by-passed in day to day practice and teaching of trainees or execution by experienced surgeons and orthodontists. The first is an explanation and demonstration of the surgical expertise behind the technical execution of the three most used procedures, namely the Le Fort I, the bilateral sagittal split osteotomy and the genioplasty. These are presented in a concise step-wise fashion to allow for ease of referral and assimilation by surgeons and distilling the relevant surgical aspects essential for the orthodontist to reliably translate treatment planning in the clinic to success post-operatively.

The second is the How to Plan cases, probably the most neglected but essential aspect of surgical and orthodontic practice. We will be covering the basic important principles, through to advanced hands-on planning techniques, independent of software access or type. Here, we will include the innovation of anteroposterior cephalometric analysis, clarified with respect to skeletal, soft tissue, and dental relations in both lateral and anteroposterior respects. A treatment planning algorithm will be presented unambiguously with considerable emphasis on the development of a visual treatment objective. This course is designed to meet the specific needs of Orthodontists and Surgeons in Maxillofacial and Plastic Surgery. Experienced clinicians will appreciate this as a thorough refresher course with gems for improving the diagnostic and surgical aspects of everyday practice.

We have designed the master classes to flow with didactic continuity in a captivating and engaging manner by having most of the talks delivered by Professor Johan Reyneke, a world respected authority in Orthognathic surgery, Johan is a sought after teacher and speaker on the subject world-wide and is invited several times a year to speak internationally. He has dedicated his professional career to the advancement of this subject to which all three presenters are dedicated to promote and make accessible to patients. All three of the speakers have excellence as their core value in the delivery of care and to share their expertise with surgical colleagues, surgical trainees and orthodontists who wish to develop an interest and engage in orthodontics for orthognathic surgery.

The course is run over two days. An extra half day hands on treatment planning session is offered FREE to the first 20 registrants onto the course. The half day course will only accommodate 20 participants.

This course has been organised by Manolis Heliotis, Consultant Maxillofacial Surgeon, London Head and Neck Specialists, The London Clinic.

WHO SHOULD ATTEND?

This detailed Master Class is a MUST attend event if you are seeking to ensure that you are completely up-to-date with the latest thinking and developments in Orthognathic surgery.

From, clinicians to doctors and from surgeons to dentists - anyone involved in this vital area of patient treatment should book their place NOW at www.shaping-faces.com

PROFESSOR JOHAN REYNEKE

BChD, MChD, FCMFOS (SA), PhD

Professor Reyneke is currently the director of the Centre for Orthognathic Surgery at the Sunninghill Hospital in Johannesburg, South Africa, and an associate professor in the Division of Oral and Maxillofacial Surgery at the School of Dentistry at the Universidad Autonoma de Nuevo Leon in Monterrey, Mexico. He holds clinical professorships in the departments of oral and maxillofacial surgery at both the University of Florida in Gainesville, Florida, and the University of Oklahoma Health Sciences Center in Oklahoma City, Oklahoma. In 1997, he received an honorary professorship in the Division of Maxillofacial and Oral Surgery at the University of Witwatersrand, Johannesburg, South Africa. He is currently the president of the College of Maxillo-Facial and Oral Surgeons in the Colleges of Medicine of South Africa.

DR CARLO FERRETTI

BDS, MDent, FCD(SA)MFOS

Dr Ferretti is a consultant Maxillofacial surgeon in part time academic practice at the famous Baragwanath Hospital, the largest hospital in Africa and in private practice in Johannesburg, South Africa. He has years of experience in teaching and training surgeons and his experience in Maxillofacial Surgery is substantial and broad. He has excelled in orthognathic surgery with a large practice and has been awarded numerous national academic awards for excellence in academic surgery. He is very active in clinical and basic science research with a large publication record in the scientific literature.

MR MANOLIS HELIOTIS

BDS, MBChB, MSc, FDSRCS, FRCS

Mr Heliotis is a consultant Maxillofacial surgeon at the North West London Regional Maxillofacial Unit at Northwick Park Hospital, one of the largest units in the UK. He is the Clinical Director for the Head and Neck Directorate of his hospital. He is in private practice in central and north west London. His subspecialty passion is orthognathic surgery with a substantial experience in surgical training of registrars. He holds an honorary clinical lectureship position with Imperial College School of Medicine in recognition of his substantial research output.
